Cicero.

For this yeere of our Lord God. 1598.

The golden number is. iii.
The Epact is likewiſe. iii.
The Circle of the Sunne, is xi.
The Sunday letter, is A.
The Romane Indiction. xi.
Septuageſima Sunday, the xii of Februarie.
Quadrageſima, or firſt Sunday in Lent, is the v. of Marche.
Eaſter day is the xvi. of Aprill.
Rogation Sunday, is the xxi of May.
Aſcenſion day is the xxv. of May.
Whitſunday, is the iiii. of Iune.
Aduent Sunday, is the iii. of December.
Interuallum, or the iuſt ſpace betweene Chriſtmas day, and Shroueſunday, is ix. weekes.
Betweene Whitſunday and Midſomer is iii. weekes.
Sundayes betweene Trinitie and Aduent, are xxiiii.
This yeere there wyll appeare and be ſeene three Eclipſes, that is, one of the Sunne, and two of the Moone.
The firſt Eclipſe is of the Moone, and that is on the xi. day of February, about halfe an houre after v. a clock in the morning.
The ſecond Eclipſe is of the Sunne, and that is on the xxv. daye of February, ſomewhat before .xi. a clocke before noone.
Another Eclipſe of the Moone, is on the vi. day of Auguſt, halfe an houre after vii. a clocke in the euening: of whoſe ſignifications or euents, I omit to ſpeake.

Diuers neceſſarie elections, concerning Phiſicke and Chyrurgery.

If any of the foure naturall powers, ſeruing for nutricion be weakned, and is not able to do theyr proper office and duetie, for the amending and ſtrengthening thereof, the courſe and motion of the Moone vnder the xii. celeſtiall ſignes of the Zodiake, would be duly conſidered.

The Moone being well affected, in	Fierie ſignes.	Aries and Sagittari.	The vertue attractiue is beſt comforted, for it worketh with heate & drineſſe.
	Earthy ſignes.	Taurus & Virgo.	The vertue retentiue is moſt ſtrengthened, for it worketh with colde and drineſſe.
	Ayrie ſignes.	Gemini firſt halfe of Libra & Aquarius.	The vertue digeſtiue is beſt comforted, for it worketh w temperate heat and moiſtneſſe.
	Watery ſignes.	Cancer laſt halfe of Scorp. & Piſces.	The vertue expulſiue is beſt repayred, for it worketh with cold and moyſtneſſe.

Note, that from the change of the Moone, to the firſt quarter, and from the full to the ſecond quarter, the humors do moue from the internall parts, to the outward members: as contrarywiſe, from the firſt quarter to the full, and from the ſecond quarter to the change, they are caryed by a diuers motion, from the outward members to the inward parts of the body. Therfore in the firſt and third weekes of the Moone, it is beſt vſing externall euacuations, as Phlebothomie, Bathes, Cupping, &c. But in the ſecond and fourth weekes of the Moone, internall euacuations, or purging medicines, are miniſtred with beſt ſucceſſe.

When the weather is very hotte, or very colde, it is extreamlie dangerous eyther to purge or let blood, vnleſſe preſent and vrgent neceſſitie require the ſame, as the only moſt preſent and ſpeedy remedie.

Prepare any humor, when the Moone is in an ayrie ſigne, as namelie in Gemini, the firſt halfe of Libra, or in Aquary.

A Purgation is beſt taken, the Moone being in a watrie ſigne.

Electuaries. in Cancer.
with Potions. in Scorpius.
Pylles. in Piſces.

Phlebothomie is generally to be commended, when the Moone is well affected in Cancer, Aquarius, or Piſces: but in any wiſe by counſell and conſent of ſome good and expert Phiſition.

Bathe for health, the Moone being in Aries, Leo, or Sagittarius: and for cleanlineſſe, ſhe being in Libra or Piſces.

An oyntment or plaſter, is beſt applyed, when the Moone is in that ſigne which gouerneth the ſame member to which it is appliable. But for the amendment of any defect or want, cureable and ſupplicable by the vſe and application of the hand, it is farre otherwiſe: for in ſuch a caſe muſt euer be remembred, that it is very dangerous, and extreame perillous, to open a veyne, or to make any notable inciſion, or cauterization in any member, when the Moone is reſident in that ſigne which ruleth the ſame member.

Chyrurgian here, in ſteede of long diſcourſe
this Figure is prefixt, thy hand to guyde.
Let Art and knowledge ay direct thy courſe,
and rule thy worke, ſo ſhalt thou ſeldome ſlide.
And ſince vpon thy hand, thy knife, and ſkill,
the pacientes health, and oft his life doth reſt.
Haue God in minde, his feare be with thee ſtill:
ſo ſhall thy hand, thy knife, and ſkill, be bleſt.

A Declaration how the twelue Celeſtiall Signes do rule and gouerne in each part of mans body.

Aries the Head; Taurus the Necke doth guyde.
Gemini th'armes; Cancer Stomacke and Breſt.
Leo the Hart; Virgo the Belly, Syde.
Reignes, Nauel, and Buttockes Libra loues beſt.
Scorpio keepes Secretes ſure in his neſt.
Sagittarius the Thyghes; the Goate Knees doth craue.
Legges Aquarius; Piſces the Feete wyl haue.

Ianuarie hath.xxxi.dayes.

Colde Ianuarie loues hot clothes,
Warme meates and brothes are beſt:
Bloodletting is vnholſome : Bathes
Vſe none but warme : flye reſt.

A Prognoſtication for this yeere of our *Lord and Sauiour* Ieſus Chriſt.

1598.

Publiſhed by *Gabriell, Friend*, ſtudent in Aſtrologie and Phiſicke.

Imprinted at London
by Richard Watkins and
Iames Roberts.

Cum priuilegio Regiæ Maieſtatis.

A generall diſcription of the foure quarters of this yeere of our *Lord God. 1598.*

Of Wynter.

Winter, by our Aſtronomicall computation, beginneth at the entrance of the Sunne into the firſt minute of Capricorne, which is this yeere 1598. on the 12. daye of December foregoing, and continueth vnto the tenth of Marche folowing. Now hath the Sunne his greateſt South declination from the Equinoctiall lyne, riſing Southeaſt, and ſetting Southweſt: And now is the Hyemall or Winter Solſtice, making with vs the ſhorteſt day and longeſt night in all the yeere.

This ſeaſon by proper inclination is colde and moyſte, not folowing the diſpoſition of the ſigne Capricorne, which is of qualitie colde and drye, in complexion compared vnto melancholy, bitter of taſte, nocturnal, feminine, meridional, and of the earthy Trigon: but is rather imported, that as the Goate is a light beaſt, naturally deſirous to climbe, ſo doth the Sunne then begin to mount and riſe higher within our Meridian, when he is once entred into that celeſtiall ſigne.

Diſeaſes vſually afflicting mens bodyes this quarter, are, Hoarſenes, colde Laſkes, Rhewmes, Coughes, ſwelling in the face by occaſion of the Toothache, the Stone, the Goute, Dropſie, Melancholy paſſions, Agues of ſundry ſorts, with ſome other troubleſome diſeaſes, not at the beginning perfectly vnderſtood, though too ſenſibly felt, if it pleaſed the Almightie to the contrarie.

Tis ſinne O man that makes thy body ſicke,
Repent in time, ere that it hurt thy minde:
Search thou thy life, yea ſearch it to the quicke,
And then reſort where thou thy health mayſt finde.
That is to God, who euer hath in ſtore,
A preſent ſalue, that healeth euery ſore.

Of the Spring.

The Winter reuolution being fully finiſhed, the Sunne mounteth, and mooueth into the firſt degree of the firſt equinoctiall ſigne Aries, at which very inſtant moment the Spring time hath his beginning, which will be this yeere on the xi. day of Marche. Now is the Vernall Equinoctiall, the Sunne ryſing at vi. a clocke in the morning, and ſetting at vi. a clocke in the euening, making the Artificiall day equall with the night.

This quarter is naturally hot and moyſt, reſembling the ſanguine complexion, and not vnlike to the element of Ayre. And although Aries be a ſigne hot and drye, cholericke of complexion, bitter of taſte, mooueable, of the day, Maſculine, eaſterly, and of the fiery Trigon, yet ſuch effect the Sunne worketh therein, that this is the moſt delicate and temperate time of the yeere, nothing ſubiect to ſuch inconueniences as other times do bring. And whereas this ſeaſon, being naturally hote and moyſte, and that with temperance, muſt needes be moſt healthfull of it ſelfe, yet ſheweth it foorth many ſickneſſes, as Aches, Stitches, Crampes, Pluriſies, Meaſels, ſmall Poxe, inflamation of the Lyuer, and diuers other vſually raging in this time of the yeere.

Of ſtrange euents I know ſome loue to heare,
To whoſe deſire, I willingly conſent:
For why I ſee a Monſter will appeare,
Although he be full cloſe in priſon pent.
And would you know what monſter this ſhould be:
Tis Pride, O Man, thats cloſely pent in thee.

Of Summer.

The third quarter of the yeere, called Sommer, hath beginning on the 12. day of Iune, at the entring of the Sunne into the firſt minute of Cancer, which is the Sommer Solſtice: And now is the day at the longeſt, and the Sunne higheſt ouer our heads, and in no other time of the yeere commeth ſo nigh vnto the North, ryſing in the morning farre Northeaſt, and going downe as farre Northweſt. This ſeaſon is commonly hot and dry, exhauſting mens bodies with immoderate heate, with ſweating and deiection of appetite, howbeit very neceſſarie for the ripening of ſuch fruites as God hath prouided both for man and beaſts. And although Cancer be a ſigne colde and moyſt, without taſte, compared to fleame, feminine, nocturnall, northerly, and of the Watry Trigon, yet it [illegible] the effects before ſpecified, but dooth rather expreſſe, that then the Sunne beginneth like a Crabbe to creepe backward to the South, and by litle and litle to forſake her Northerly habitation.

Sundry diſeaſes doth vſually raigne in this Sommer quarter: as Tertian and quartane Agues, Fluxes, Pleuriſies, ſmall Pox, Purples, Meaſels, and diuers other painfull ſickneſſes, which Almightie God, for his great mercies ſake, releeue vs in, with comfort in Chriſt Ieſus our Lord and Sauiour.

In Sommer ſeaſon what is like to hap,
I thinke it not amiſſe to let you know:
That you hereby may ſhun an after clap,
And ſay twas friendly Friend that did it ſhowe,
Who ſpends this time in ſinne and wickednes,
In time to come, ſhall waile in wretchednes.

Of Haruest.

Haruest, being the fourth and laſt quarter of this yeere, after our vſuall computation, beginneth the 13. day of September, the Sunne then entring into the ſigne Libra, working the like effect that he did at his going into Aries, that is, making the day and night againe of equall length, for then the ſunne ryſeth and ſetteth at 6. in the morning and euening. And Libra is a ſigne warme and moyſte, ſanguine, ſweete of taſte, diurnall, Maſculine, weſterly, moueable, and of the ayry Trigon, not cauſing the ſeaſon to be ſuch, but rather expreſſing this qualitie, that the Sunne poſſeſſing this ſigne, the dayes and nights are peyſed (as it were) in equall ballance. But in truth this ſeaſon naturally is colde and drye, inconſtantly diſtempered, ſometime hot, ſometime colde, otherwhyles warme dayes anſwered with colde nights, altogether dangerous for the health of man, without very wary circumſpection.

This time of the yeere, refuſeth no diſeaſes, as quartane Agues, blacke Iaundies, obſtructions, Pyles, Sciatica, the Goute, and many moe, tedious to be repeated. Therefore let vs humbly beſeech the Almightie, by our daily, feruent and zealous prayers, to aſſwage his puniſhments, and to extend his bleſſings towards vs.

O then repent, leaue of henceforth to ſinne,
And call and crye to God for his good grace:
Refuſe ſuch wayes as thou haſt walked in,
Correct thy faults, whylſt thou haſt time and ſpace,
Leaſt all too late, thou ſeekſt, and cannot finde:
The ioy or comfort to thy troubled minde.
